re: new type of registration plates in Poland - professional registration plates

Dear Sirs,

We kindly inform you that as from 11th July 2019 a new additional type of registration plates has been introduced in Poland: professional registration plates.

This matter is regulated by the Decree of Minister of Infrastructure dated 12th March 2019.

Professional registration plates are intended for use by vehicle manufacturers, distributors and research entities and can be attached to vehicles which have never been registered in Poland or abroad. The plates are transferable: they can be removed from one vehicle and attached to another one.

Colours of professional registration plates: green letters and digits on white background.
Insignia on the plates: blue band with the European Union symbol consisting of 12 yellow stars arranged in a circle and white letters PL.

Seal of legalization: legalization sticker.

The registration number of professional registration plates is composed of the assemblage of the following 25 letters: A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, R, S, T, U, V, W, X, Y and Z and digits between 0 and 9.

The individual letters and digits of the professional registration number have the following functions: the first letter is voivodship's distinguishing mark, two digits within the range from 01 to 99 are a distinguishing mark of a poviat, the next five letters and digits (the third one always being "P" as in "professional") constitute the identifier (distinguishing mark) assigned to the vehicle.

We enclose examples of Polish professional registration plates.

We kindly ask you to circulate this information to all National Bureaux of the CoB.

Yours faithfully,

Mariusz W. Wichtowski
Chairman
